

Project Design Phase Problem – Solution Fit Template

Date	7 July 2026
Team ID	
Project Name	Heart Disease Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

Define CS, P't into CC	1. CUSTOMER SEGMENT(S) CS  Healthcare professionals, researchers, hospitals, health departments and general public seeking heart disease insights.	6. CUSTOMER CONSTRAINTS CC  Lack of clear visualization, time-consuming manual analysis, difficulty in identifying high-risk groups, limited understanding of combined risk factors.	5. AVAILABLE SOLUTIONS AS  Manual reports, Excel sheets, existing dashboards with limited interactivity, statistical reports.	Explore AS, differentiate	
	2. JOBS-TO-BE-DONE / PROBLEMS J&P  Identify and analyze major risk factors contributing to heart disease, compare cases across groups and support data-driven decisions.	9. PROBLEM ROOT CAUSE RC  Data is scattered, no interactive tool to explore multiple factors together, limited awareness of combined impact of lifestyle and health conditions.	7. BEHAVIOUR BE  Compare reports manually, use Excel for basic analysis, rely on experience and assumptions, spend more time creating reports.		Focus on BE, understand RC
	3. TRIGGERS TR  Increasing heart disease cases, news and reports about lifestyle diseases, regular health checkups, doctor's recommendation.	10. YOUR SOLUTION SL An interactive Tableau dashboard using the Heart_new2 dataset to visualize and analyze risk factors such as age, gender, BMI, smoking, alcohol, physical activity, diabetes, stroke and more through filters and visualizations.	8. CHANNELS of BEHAVIOUR CH  Online: Tableau dashboard on computer/laptop, share reports (PDF/screenshots), use filters and dashboards remotely.		
4. EMOTIONS: BEFORE / AFTER EM  Before: Worried, confused, unsure. After: Informed, confident, relieved, able to take action.
